Teach more. Click less.

Everything a teacher needs in one place — classes, summaries, homework, the school library and their salary — for students with or without their own login.

ONE DASHBOARD, TWO KINDS OF STUDENT

Your students, however they learn 🤝

Some students have their own login; others are **managed** by the school (often young kids without email). Teachers see both in the same lists — managed students carry a **MANAGED** badge — and Clemify takes care of reaching each one the right way.

👧 Managed students

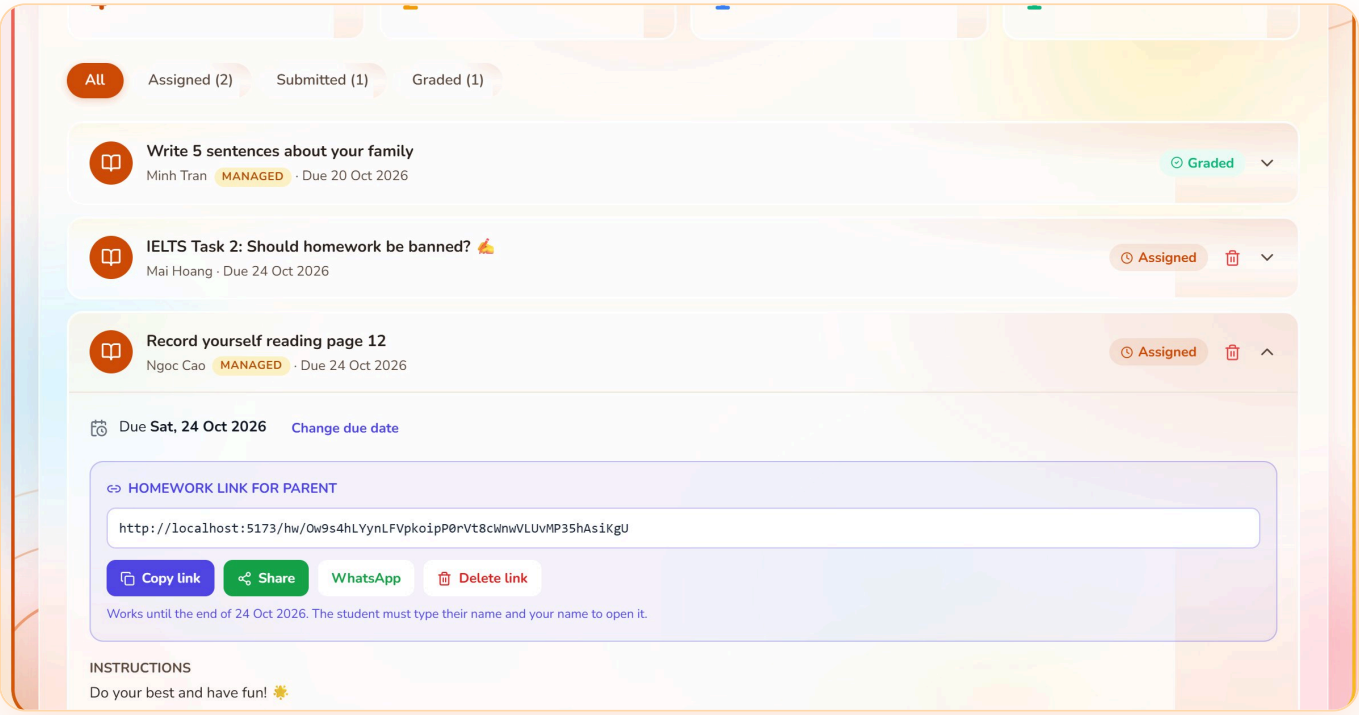

No login · reached through the family

- You confirm they joined the class
- Homework & quizzes go out as a **parent link** (copy · share · WhatsApp)
- Your class summary is emailed to the family
- "Remind to join" emails the family address

🎒 Student accounts

They log in themselves

- They join, chat and book your free slots themselves
- Homework, quizzes and vocabulary in their own dashboard
- They read your summaries in **Class reports**
- They rate classes → your **Rating Insights**

💡 Above: a homework for a managed student — the parent link is ready to copy, share or send on WhatsApp. It opens only with the child's name and yours, and stops working at the end of the due day.
