THE BIG CHOICE

Two kinds of student, one dashboard 🤝

Every school is different. Some teach young kids who don't have an email; others teach teenagers and adults who want their own app. Clemify handles both — side by side, in the same Students tab.

👶 Managed students

No login · run by the school

- No email or password — just name, age and level
- Homework & quizzes open from a **magic link** sent to the family
- Teacher confirms attendance; the family double-checks with one tap
- Class summaries, recordings and links emailed to the family
- Emails in English or Vietnamese, per family

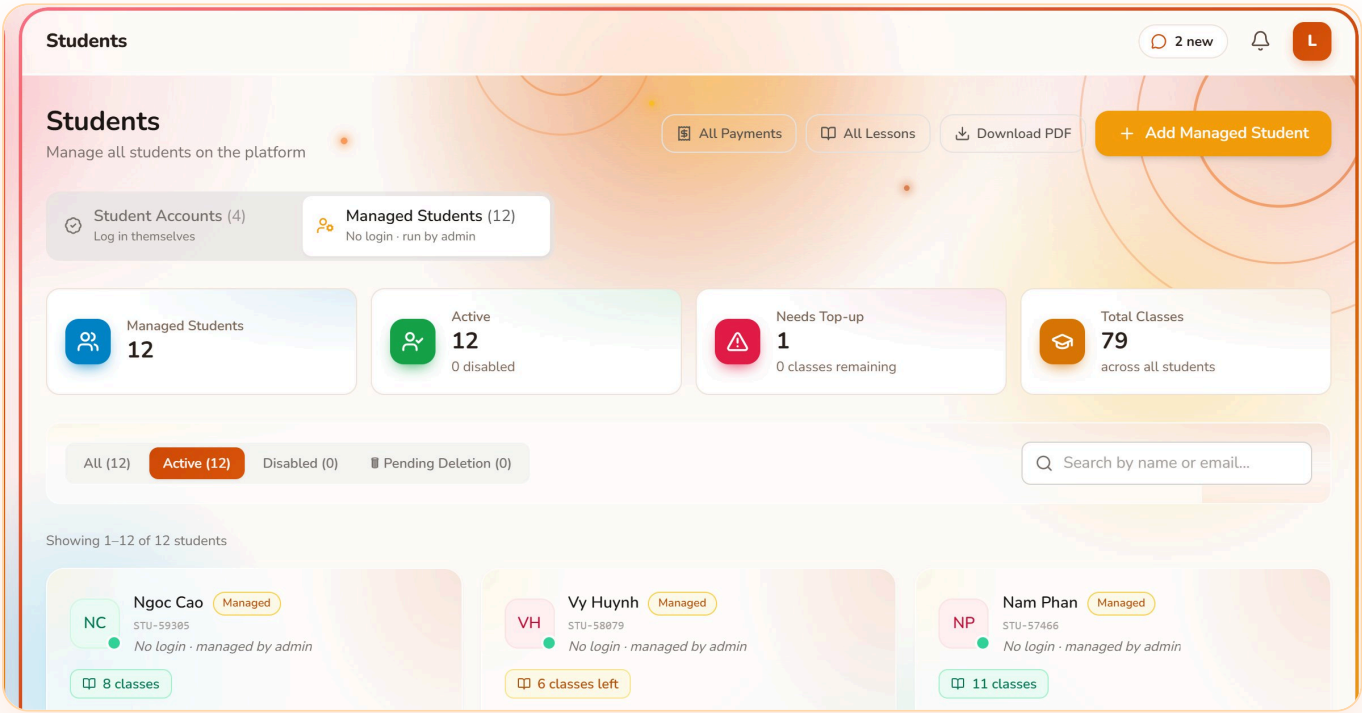

Best for: young learners, busy families

🎒 Student accounts

They log in themselves

- Their own dashboard on phone or computer
- Book classes, join group classes, chat with their teacher
- AI conversation coach & pronunciation coach
- Badges, streaks, leaderboard, certificates
- Rate classes and invite friends for free classes

Best for: teens, adults, exam students
