CLEMIFY

Student Guide · Pro Plan · Student Accounts

Give every student their own superpower.

What happens when your students log in themselves: AI practice, games, badges and progress they can see. Real screenshots, real magic ✨

Made with ❤️ (and lots of ☕) by the Clemify team

CHAPTER 1 · THE BIG UPGRADE

Why give students their own login? 🤩

With managed students, **your school** does everything. With student accounts, students **learn between classes**: they practise, play, track their progress and bring their friends. Your teachers teach the same hours; your students learn **twice as much**. 📈

AI practice 24/7

An AI conversation coach and a pronunciation coach, available day and night.

Learning feels like a game

Streaks, 16 badges, confetti and a school leaderboard.

Self-booking

Students pick a teacher and a free slot themselves. Less admin work for you.

Progress they can see

Charts, class reports and certificates keep students (and parents) motivated.

Quality you can measure

Class reviews and teacher rating insights catch problems early.

Free marketing

Referral links give a free class per friend who joins. Students sell for you!

💡 **In one sentence:** managed students *attend* your school; students with accounts *belong* to it. And students who belong stay longer. 🧡
